Land for Industry in Calgary 82

Introduction, Summary, Definitions & Assumptions

INTRODUCTION

The "Calgary Industrial Land Survey" for the City of Calgary has been issued since 1971. Starting in 1980, the semi-annual publication was discontinued and one mid-year report is prepared covering a twelve month period.

Similar to preceding reports, this present issue records historical data relating to industrial land absorption, subdivision activity and provides an inventory of vacant industrial land. Detailed information is given, particularly for sites which are currently vacant and developable.

The present report of 1985, June 30 compiles data pertaining to:

a. Industrial land absorption from 1976 to 1985, June 30. Table 1 shows the number of sites and their size (net acres) by type of use, land use designation, and services provided.

b. Industrial subdivision plans registered between 1976 and 1985, June 30. Table 2 shows the number of sites, and their gross and net areas created.

c. The inventory of vacant developable industrial land. The data are presented in four components:

   i) A summary of vacant lands by industrial districts and land use designations. Ownership both private and City is also noted (Table 3).

   ii) A list of vacant sites by sections of the city describing the location of these properties. The land use designation and ownership of each item is also shown.

   iii) The annual vacant industrial land inventory from 1976, June 30 to 1985, June 30 (Table 4).

   iv) Vacant, developable parcels are shown on section maps, which also indicate the land use designations.

d. Future industrial subdivisions within the planning process (Table 5). The location, acreage and date of anticipated market availability are also noted.

SUMMARY

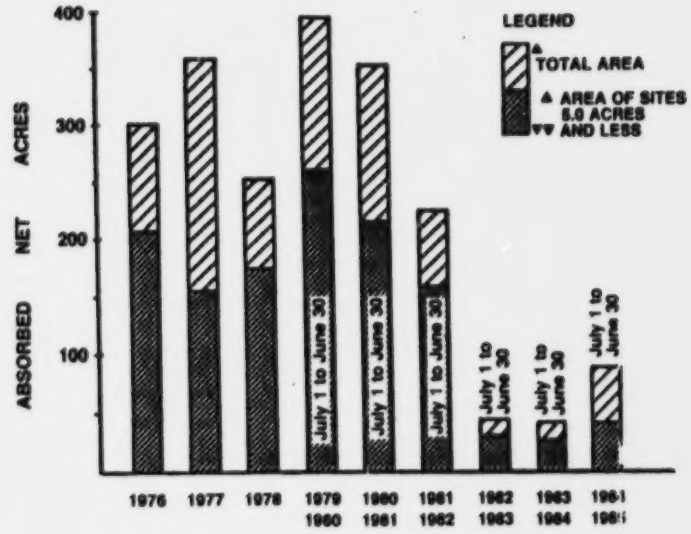
Land Absorption

Statistics presented in Table 1 show that, from 1984, July 1 to 1985, June 30, 89.2 net acres of industrial land have been absorbed in Calgary. This is about twice the size of the average annual absorption of the preceding two years. Total industrial land absorption in Calgary over the past five years was as follows:

1980, July 1-1981, June 30	351.5 net acres on	130 sites
1981, July 1-1982, June 30	223.6 net acres on	98 sites
1982, July 1-1983, June 30	45.4 net acres on	19 sites
1983, July 1-1984, June 30	43.4 net acres on	17 sites
1979, July 1-1980, June 30	89.2 net acres on	25 sites

The following graph well reflects the rise and fall of Calgary's economy and its most recent recovery trend.

INDUSTRIAL LAND ABSORPTION IN CALGARY, 1976-1985
IN NET ACRES



The 41.8 acres of land included within the "0.1-5.0 acres" site size category represented an approximate 47.2 per cent increase from the previous year's 28.4 acres figure. The number of sites absorbed within this category rose by 6, an increase of 40.0 per cent.

The distribution of the total industrial land absorbed during the last five years by major type was as follows:

Industrial Acres Absorbed by Type of Use

	Warehousing & Commercial Net Acres		Other Industrial Net Acres	
1980, July 1 - 1981, June 30	269.5	76.7%	82.0	23.3%
1981, July 1 - 1982, June 30	149.3	66.8%	74.3	33.2%
1982, July 1 - 1983, June 30	13.3	29.3%	32.1	70.7%
1983, July 1 - 1984, June 30	15.1	34.8%	28.3	65.2%
1984, July 1 - 1985, June 30	41.4	46.4%	47.8	53.6%
Summary	488.6	64.9%	264.5	35.1%

During the past five years the average annual industrial land consumption attributed to warehousing and commercial purposes was 65 per cent of the total. The contrary trend recorded in the last two years has little weight in the five years average because of the greatly reduced total land absorption.

Subdivision Activity and Vacant Land

During the 1984, July 1 to 1985, June 30 period, 74 gross acres of industrial land were subdivided into 35 parcels (71 net acres). Most of these lands are contained within the I-2 General Light Industrial District.

About 95 per cent of this subdivided land is located within the northeast area of the city. Approximately 5 per cent is contained within the south. There was no new industrial land subdivision in the southeast.

Calgary's 1985, June 30 vacant industrial land inventory is summarized on Tables 3 and 4. The total vacant industrial land stock at that date was 1,721 net acres, of which the City of Calgary owned 442 acres or 25.7 per cent. It should be noted that the total inventory figure includes 371 acres located in Sections 22-23 SE which is not serviced by the City water and sewer system. Developments in this area have been approved for companies not requiring municipal services. However, companies developing in this area are required to sign a deferred servicing agreement with the City which requires them to tie into City services as and when they become available. Similarly, 133 acres of non-serviced sites in the SW ¼ of Section 25 N and portion of Section 10 NE are also part of the total vacant land figure.

The vacant industrial land inventory has increased by 78 acres since 1984. Assuming even a gradual level of economic recovery, the present inventory appears to be sufficient to meet anticipated demand for ten or more years. In addition to this inventory, the figures within Table 5 indicate that a further 464 gross acres of land are coming on-stream to meet the future demand. It is also worthy of note that, the present high vacancy in existing industrial structures will probably satisfy most of the growth demand in the coming years.

DEFINITIONS & ASSUMPTIONS

a. For the purpose of this report "land absorbed" means land which was previously designated as vacant and for which a building permit (in certain cases only a development permit) was issued during the year under study.

b. Vacant developable industrial sites are those parcels which, according to the Calgary Property File[1] have no building assessment and either designated for industrial use or having an assessment classification[2] of "industrial vacant". However, some parcels which are

1. The "Property File" is a computer record composed of data relating to properties generated from the operation of Civic Departments.
2. The assessment classification is a coding system indicating the type and tax status of all lands or buildings located in Calgary.

not included in the Property File as vacant may also be shown in this report as "vacant developable industrial sites". These parcels comprised portions of a site that were visibly separated from the developed portion and sometimes even posted as "for sale". It should be recognized that although a site is vacant and developable, it does not necessarily mean that it is available for marketing. The land may be held as reserve for future expansion of existing companies, in other cases the owner may not wish to sell or develop it at the present time. Thus, within the context of this report, "vacant developable" land is defined as an industrial land having the necessary physical qualities to permit building and having no existing structure, permanent storage or industrial activity on it. It should also be appreciated that some sites listed in this inventory may already be scheduled for some future industrial development, but as building permits have not been issued yet, these properties are registered in this report as vacant land.

Parcels in the following broad categories were excluded from the inventory:

i) Lots without municipal services, where it was determined that, at the present time, the land could not be serviced economically. However, those unserviced sites in Sections 22 & 23 Southeast and those in the SW ¼ of Section 25N are included in the "developable" vacant lot inventory. In the southeast area developments are permitted to provide less expensive "incubator" space for industries not requiring immediate full services. Accordingly, the Land Use Designation of these sites is I-4, "Limited-Serviced Industrial District". However, when City services are extended into these sections, owners will have to tie their properties to the utility network. The industrial subdivision in Section 25N is under a Direct Control Land Use Designation, allowing agricultural implement dealerships and associated uses only.

ii) Parcels without buildings, but on which regular outside storage or other activity is carried on (e.g. lumber yards).

iii) Parcels obviously part of an active neighbouring industrial establishment, owned by the same owner and usually surrounded by a common fence.

iv) Isolated small parcels with limited or no access.

v) Parcels lying in areas planned to be re-subdivided.

vi) Parcels in the alignment of future freeways.

vii) Parcels still vacant but where permits had been issued for building before 1985, June 30.

viii) Parcels owned or leased by Calgary Power Ltd. having high voltage power lines over them.

ix) Community reserves within an industrial area.

c. Land Use Classification and Land Use Designation categories have been shown in this report by abbreviations as they are used in the Development Control By-law (By-law 8600) and in the Calgary Land Use By-law (By-law 2P80).

Land Use Classifications according to By-law 8600 are:

M-1	Restricted Light Industrial District
M-2	General Light Industrial District
M-3	Heavy Industrial District
AM	Agricultural (Future Industrial) District
AP	Airport District
DC	Direct Control District
SDA	Special Development Area. The SDA is not a separate category but is combined with other classifications. Developments in Special Development Areas are subject to regulations described in the Development Control By-law.

Classification designations in brackets indicate a guideline attached to AP or DC categories, e.g. DC(M-2) = Direct Control with M-2 guidelines.

Land Use Designations according to By-law 2P80 are:

I-1	Industrial-Business Park District
I-2	General Light Industrial District
I-3	Heavy Industrial District
I-4	Limited-Serviced Industrial District
UR	Urban Reserve District
